-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 December 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see submission of certified translation of foreign priority document to perfect the claim to foreign priority, filed 12/8/03, with respect to the 35USC102(e) rejection under KORENEK, Jr. (6527408) have been fully considered and are persuasive. The rejection of claims 6-36 under 35USC102(e) has been withdrawn.

Drawings

2. The drawings of corrected Figures 1-7 were received on 12/8/03. These drawings are approved. Note however that corrected copies of Figures 8-9 were not received and these figures of the drawings remain objected to although the proposed correction has been approved. Note also that the formal copy of Fig.2 has the term, "Illuminaing Signal Generator" in box "114", misspelled.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 7,13,15,16,19,22,27, and 34 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 7,13, and 34 recite that "an inner tube comprises the air valve stem". There is no disclosure or inherent requirement that the "air valve

Art Unit: 2875

stem" is connected to "an inner tube". Motorcycle wheels such as the ones shown in applicant's Figures 8-9 are tubeless and as such there is no valve stem connected to an inner tube. Claim 15 recites that the "housing comprises a substantially waterproof enclosure". There is no disclosure that the housing shown in Figs.8-9 is a substantially waterproof enclosure. Claims 16 and 22 recite that the "housing further comprises an ornamental shape". There is no disclosure or showing of a housing having "an ornamental shape". Claims 19 and 27 recite that the "motion sensitive switch energizes said light source for a predetermined time following movement of the wheel". There is no disclosure that could be found that the light source is energized "for a predetermined time following the movement of the wheel" nor showing of a circuit providing such a function.

Allowable Subject Matter

5. Claims 6,8-12,14,17,18,20,21,23-26,28-33,35, and 36 are allowed.

Conclusion

6. Applicant's response has overcome the art rejection but since the 35USC112 rejection remains an issue an interference cannot at this point be initiated since a prerequisite for interference under 37 CFR 1.606 is that the claim be patentable to the applicant subject to a judgment in the interference.
